## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 27, 2003 has been entered.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Strepparola (US 5,980,642).

Strepparola teaches a method for removing water from surfaces comprising covering the surface with a nonionic additive having a structure of  $T-OR_f(CFY)-L$  wherein L is  $X-CH_2CH_2(OCH_2CH_2)_nB$  and  $R_f$ , n, X, B and Y are as set forth in the claims ix as set forth in the claims. The  $T-OR_f$  portion has a molecular weight between 500 and 1200 and the ratio by weight (K) between the perfluorinated moiety and the

Art Unit: 1714

hydrogenated moiety is between 1.5 and 3.5 (see abstract; col. 1, lines 32-67 and col. 2, lines 1-9).

Accordingly, Strepparola teaching all the limitations of the claim anticipates the claim.

4. Claims 1-10 and 12-14 are allowable because Applicant's arguments presented in the preliminary amendment are persuasive. See especially paragraphs 4-8.
